## TEST AND TAG YOUR EQUIPMENT

Why should it soak up so much of your time and resources when we can manage it for you! **Call us for a free quote.**

**Health and Safety is important to both Kiwi businesses and employees. This is why our up-to-date knowledge of NZ regulations and commitment to help you to stay compliant to the NZS 3760 standard is something you can count on.**

Health and Safety (H&S) is what Straightline put first and we have put our money where our mouth is! We are SiteSafe members requiring all of our staff to have completed their H&S Passports along with specialist and advanced certification for our Management team.

### Advanced technology – what we offer:

- **Inspect:** Visual inspection for defects such as damage or missing components and a number of electrical tests to measure earth continuity, insulation resistance and polarity.
- **Test:** Electrical testing of appliances for fire and electrical safety to the required standard.
- **Tag – Pass:** Compliant appliances with a customised tag to confirm the appliance has been tested to the required standard.
- **Tag – Fail:** Non-compliant appliances with a 'WARNING' tag for your safety. We alert them to you for repair or replacement.
- **Report:** Listing the number of appliances tested and failed – outlining recommendations.
- **Certification:** To say the site has been tested to the standard for audit purposes.
- **Heads Up:** Proactive reminder to let you know when your appliances are due for re-testing in order to remain compliant. i.e eliminate the worry about your appliances expiring because we provide a reliable follow-up service.

**All electrical equipment and appliances classed as portable or transportable now require a periodic safety check.**

(i.e. any equipment that has a flexible cable and/or plug fitted for mains operation).

**Compliance obligations? We're here to help. Call us on 0800 SLE (753) 333 or email [info@straightlineelectrical.co.nz](mailto:info@straightlineelectrical.co.nz)**
